

Research Vision

To be a leading research center that will actively contribute to the generation and dissemination of new knowledge and the enhancement of the quality of life.

Research Mission

- To promote full and active participation of all researchers.
- To administer and coordinate optimally all fully and partially funded research.
- To establish centers of excellence in strategic research areas.
- To provide consultancy services and excellent collaborative research to public and private sectors through strategic partnerships.
- To offer all the members of BNCA Research Cell specialist support and information about current research activities worldwide.
- To promote publications of faculty and student research projects.
